XROW
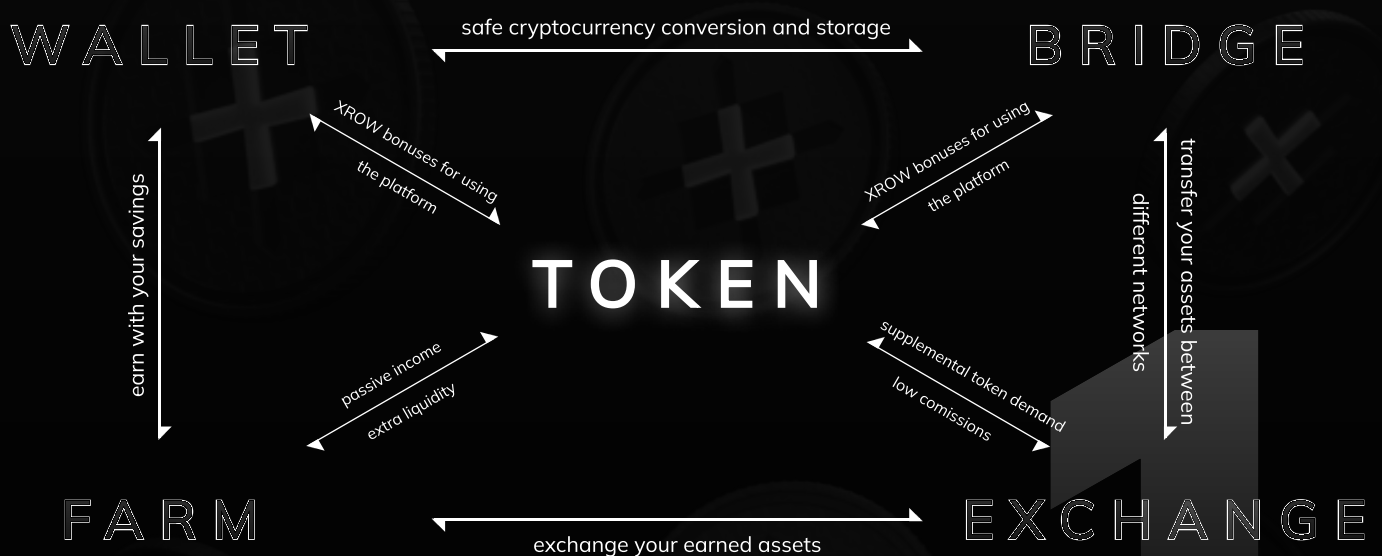

# ● Introduction:

XROW is a revolutionary ecosystem that aims to connect all web3 concepts and projects, creating mutually beneficial relationships for everyone involved. With an all-in-one platform, XROW provides a comprehensive solution for those who want to trade, buy or sell cryptocurrencies, convert assets through our bridge, and securely store their funds for long-term plans. Additionally, users can earn passive income by staking their assets within XROW's innovative plans and technology.

XROW's vision is to become the go-to destination for anyone interested in cryptocurrency. By bringing together various projects, ideas, and concepts under one roof, we aim to create a thriving community where everyone can benefit from the power of decentralized finance (DeFi) and blockchain technology. Our ecosystem is designed to be user-friendly and accessible to all, regardless of their level of expertise.
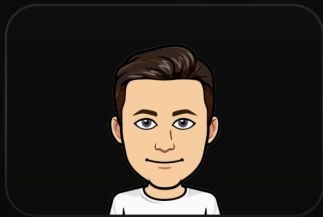

At XROW, we believe that the future of finance is decentralized. By building an ecosystem that promotes collaboration and innovation, we hope to contribute to the development of a more transparent, secure, and accessible financial system. With our advanced technology and commitment to excellence, we are confident that XROW will play a leading role in shaping the future of web3.

# • XROW Team:

As a self-funded venture, we are fully invested in making our products more accessible and affordable for everyone, particularly for those who are new to the world of digital currencies. Our goal is to simplify the complex world of crypto and provide a single platform that meets all the needs of our users.

## Team

### Alex Whale

**CEO**

A trader with 15 years of experience in forex, stocks, and cryptocurrencies. A well-known crypto influencer and enthusiast.

### Nick

**CVO**

5 years of experience managing crypto projects. He has experience working in all areas that we plan to combine now into one project.

### Boris

**CMO**

A marketing professional with strong strategic thinking skills and 7 years of experience in social media marketing. Effective marketing campaigns creator that deliver results.

### Ivan

**CFO**

A financial professional with experience in accounting and financial management. He also has skills in risk management and financial planning.

### John

**CIO / CSO / CTO**

A highly skilled technical expert and business strategist with over 7 years of experience in IT. He can design and implement the technological solutions needed for our company's success. He also has skills in risk management and security.

**XROW**

# • XROW Team:

Our company boasts an impressive track record of success and is comprised of a team of experienced and skilled specialists. Each of our leading experts is responsible for overseeing a dedicated team to ensure the most effective and efficient development of our projects.

As we continue to expand our operations and tackle new challenges, we are committed to growing our team to include the best and brightest talent in the industry. Our focus on innovation and continuous improvement allows us to stay ahead of the curve and deliver exceptional products and services to our clients.
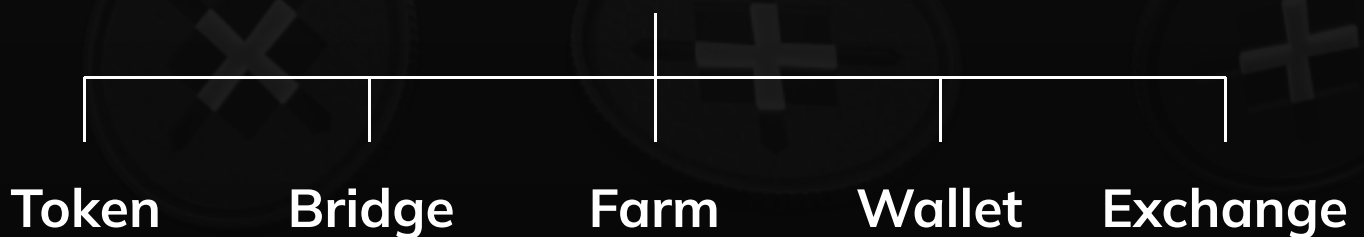

With our deep understanding of the industry, cutting-edge technology, and commitment to excellence, we are well-positioned to remain at the forefront of the market and provide unparalleled solutions to our clients.

XROW

## • Vision:

At XROW, we believe that the future of finance lies in decentralization and blockchain technology. Our vision is to build an all-in-one ecosystem that empowers individuals and organizations to have complete control over their digital assets - whether they are being converted, stored, traded, or staked. By eliminating the restrictions that currently prevent DeFi solutions from being implemented on a larger scale, we aim to revolutionize the way people interact with cryptocurrencies.

## XROW

| Token | Bridge | Farm | Wallet | Exchange |
|-------|--------|------|--------|----------|

Our platform provides a reliable and secure pathway for the movement of digital assets between various blockchain networks, including a cross-chain bridge that enables the conversion of assets from one network to another. In addition, we offer a multi-purpose wallet that serves as an integral component to facilitate communication across different blockchains, allowing swift and easy transfer of funds.

XROW

## • Vision:

We recognize that not everyone is skilled in investing or trading, which is why we are also creating a crypto farming mechanism that allows users to earn passive income by staking in their assets. These farms will not only provide an opportunity for users to generate income but also support our ecosystem by providing additional liquidity.

### XROW farm

| User | invest → | Assets | stake → | Farm | extra liquidity → | Token |

passive income

At the heart of our ecosystem is our native token, which serves as the glue that binds all of our products together. Unlike the countless useless tokens created each day, our token has a specific use case within our ecosystem, providing users with numerous benefits such as reduced transaction fees, access to exclusive features, and a share in the platform's revenue.

### XROW token

**Bridge**     **Wallet**     **Exchange**     **Farm**

Through XROW, we aim to create a fairer financial system with greater transparency, encouraging innovation and collaboration in the decentralized finance space.

# • Problems We Are Solving:

As the crypto industry evolves, the demand for user-friendly solutions is also expanding. Our target audience is the average person looking to start their journey into the world of cryptocurrency. Our goal is to provide them with all the necessary tools to do so, without getting lost in the vast array of different offerings.

## Problem:

The current state of the market presents several challenges for new users. Professional trading platforms can be too complex for beginners, with trading terminals becoming increasingly complicated each year. These platforms add new features, making them more confusing and difficult to understand.

## Solution:

To facilitate the purchase and sale of assets, we are creating a simplified version of an exchange that will be intuitive and easy to use for the average person. Many other simplified exchanges charge exorbitant fees, taking advantage of their users' lack of experience. Our aim is to provide a user-friendly platform with the lowest commission rates in the market by offering a transparent and affordable solution for our users.

## Problem:

The popular problem is known as "Not your keys, not your coins", which refers to the fact that if you do not have control over the private keys to your cryptocurrency, you do not have full ownership or control over it. Many cryptocurrency exchanges and crypto companies hold their users' private keys, which puts the users' funds at risk if the exchange or custodian is hacked or goes bankrupt.
Non-professional platforms like Revolut and Paypal do not sell real cryptocurrency while charge high fees for each transaction.

## Solution:

The best way to ensure ownership and security of your cryptocurrency is to hold your private keys yourself. This means using a non-custodial wallet that allows you to control your own keys. By doing so, you can be confident that you truly own your coins and they cannot be accessed or manipulated by anyone else. It's important to always exercise caution and due diligence when it comes to managing your crypto assets.

XROW

# ● Problems We Are Solving:

## Problem:

Staking can also be a risky endeavor for new users, as inexperienced investors are often attracted to the highest yields without realizing that proposed assets may decrease in value over time. At the time of unlock, users may receive a larger number of tokens, but these tokens may have already lost value, providing less benefit in dollar equivalent.

## Solution:

We prioritize the security and preservation of our client's funds as our top priority. In addition, we plan to offer enhanced terms and interest rates that allow for asset preservation and long-term investment strategies. Our commitment to providing a safe and profitable investment environment sets us apart in the industry.

## Problem:

Cross-chain bridges have their own set of problems, including interoperability, security, scalability, user experience, cost, and centralization.

## Solution:

To improve the problems associated with cross-chain bridges, our team is focusing on several key areas.

To improve the problems associated with cross-chain bridges, our team is focusing on several key areas.

Firstly, we are prioritizing interoperability, ensuring that our bridge supports a wide range of blockchain networks, including both established and emerging ones.

Secondly, we are working to improve scalability by optimizing our network architecture and utilizing sharding techniques.

Thirdly, we are committed to providing a seamless user experience, making it easy for users to move their assets across different chains with minimal friction.

Fourthly, we are reducing costs by using efficient routing protocols and minimizing gas fees. The fifth - and most importantly - our bridge already holds a leading position in transaction speed, and we will strive to establish ourselves as the first among competitors.

Lastly, we aim to address the issues with centralization and provide a more decentralized solution for cross-chain bridges, promoting a fair and secure ecosystem for all users.

✕ XROW

## • Problems We Are Solving:

Newcomers to the cryptocurrency industry are especially vulnerable to scams and fraudulent schemes, despite the plethora of resources available to help them verify the legitimacy of the assets they're investing in. The industry continues to evolve and grow, with new forms of deception emerging each year, making it difficult for even the most experienced investors to navigate.

That's why XROW is so crucial. We are creating a safe, secure, reliable, and intuitive platform that can help users achieve their financial goals and realize their full potential in the world of cryptocurrency and yet allow as much privacy and freedom as possible.

**XROW**

## • Why Choose XROW:

Choosing the right tools in today's competitive market can be a daunting task. However, if you're looking for a secure way to store your assets, with benefits for yourself, fast and inexpensive transactions for both transfers and exchanges across different blockchain networks, and simplified purchase and sale of cryptocurrencies, XROW is the ideal solution for you.

One of the platform's strongest features is its multi-functionality and support for each tool in the project's comprehensive ecosystem. XROW provides the most versatile, sophisticated, and convenient way to handle all the necessary tasks faced by every new user who wants to delve into the world of cryptocurrency and stay up to date with the latest trends.

**XROW**

# • Roadmap:

**Q1** 2023
___
**Token**

The initial phase of the project involved the development of a singular token that would serve as the foundation for all future endeavors within our ecosystem on the BSC network. This token, known as XROW, has already been launched on the PancakeSwap platform and is expected to be listed on various exchanges in the near future.

**Q2** 2023
___
**Bridge**

The second phase of the project, which is nearing completion, centers around the creation of a cross-chain token bridge. This feature will allow for seamless asset transfers between different networks while only incurring a small commission fee.

**Q3** 2023
___
**Exchange**

In the third stage, we plan to construct a user-friendly crypto exchange that even beginners can utilize with ease, and serve as an introductory platform to onboard people in the mass adoption of crypto and web3.

**Q4** 2023
___
**Farm**

Our fourth stage we intend to establish a staking feature where users can farm tokens to enhance liquidity for our projects, providing greater earning opportunities for our investors.

**Q3** 2024
___
**Wallet**

Finally, in the fifth stage, creation of a crypto wallet within the XROW platform, thereby eliminating the need for users to register elsewhere to store safely their assets.

**XROW**

# • Tokenomics:

XROW is a collection of various crypto instruments that are connected by a single token. Built on the BCS network due to its high popularity and low fees, the XROW token will be integrated into all areas of the project's activity.

Token name: XROW
Total Supply: 1,000,000,000

*  The minting of the second part of XROW tokens will be carried out in case of additional project funding or increased liquidity.

The address of the token contract is:
0x7Cc1c126bE3128C1f0441a893Cd6220498B27650.

All funds (except liquidity support provided for the pre-sale on the Pancakeswap) have been locked by creating a vesting contract. The address of the vesting contract is:
0xd3e050BB0e1E6Ac771d9F1F6247fc1A397e04622.

The tokenomics of the project are as follows:
**40%** Active Supply
**20%** Ecosystem Rewards
**15%** Marketing
**15%** Team and Advisors
**10%** Liquidity Support

**XROW**

# Tokenomics:

Strategic unlocking of funds will occur according to the contract schedule:

## Active Supply Unlock:

2023
Q2 - **5%**
Q3 - **10%**
Q4 - **10%**
2024
Q1 - **10%**
Q2 - **5%**

Funds will be unlocked for listing on crypto exchanges with subsequent liquidity creation.

## Ecosystem Rewards Unlock:

2023
Q2 - **5%**
Q4 - **5%**
2024
Q1 - **3%**
Q3 - **7%**

Funds will be unlocked for token adoption as part of the project expansion for various rewards for using the platform.

## Marketing Unlock:

| **0.5%** every month (30 months)

Funds will be unlocked for use in marketing and promotion to increase token awareness and the overall ecosystem.

## Team and Advisors Unlock:

| **0.5%** every month (30 months)

Funds will be unlocked to cover the costs of creating the project and creating liquidity.
